About IntrospeQt

Business Agility is a strategic imperative for organizations to sustain. IntrospeQt enables business agility by connecting the triple helix of an organization's DNA— People, Content and Process. We offer proven technology and business solutions to conquer everyday operational challenges of document and process management.

We help transform business performance by leveraging leading technologies for Enterprise Content Management (ECM)— Document Capture, Document Management, Workflows and Business Process Management (BPM). Founded by a group of experts who have extensive expertise in the ECM and BPM domain, IntrospeQt has partnered with leading industry players such as IBM FileNet and SAPERION to provide clients with proven technology platforms and business solutions.

Client Offerings

IntrospeQt's unique blend of offerings and deep domain expertise helps clients to better manage and leverage enterprise information assets and business processes.

Service Offerings

- **Implementation Services:** we architect, build and implement solutions and services on leading ECM platforms such as IBM FileNet, Alfresco, SharePoint and SAPERION
- **Consulting Services:** our experts consult on various facets of the ECM/BPM solution lifecycle, such as technology assessment, application strategy and solution architecture design
- **Knowledge Services:** our skilled instructors are FileNet certified professionals and work with clients to address key learning needs and mentor both technical and business users.

Products and Business Solutions

- **IntrospeQt InstaCapture,** a feature-rich document capture solution designed to transform paper documents into readily accessible information assets. It offers compelling features to automate document capture process, such as automatic document recognition (ADR), auto-indexing, Zonal OCR, and searchable PDF's.
- **Business Solutions,** we offer vertical specific solutions to transform content and process efficiency with technologies for document capture, workflows, forms processing, document management and records management.

The IntrospeQt Advantage

- We leverage deep domain expertise and extensive ECM and BPM experience to help you realize rapid payback on technology investments
- Our business centric approach and robust solution frameworks helps deliver solutions that work for your business
- Powered by an energetic and innovative team, we proactively help you address current challenges and scale to the demands of future business drivers
- Our strong industry partnerships enable you with best-of-breed technologies to address your everyday enterprise content and process challenges
